As a Tetris fan and owner of Tengen Tetris I would have loved this game so much... if it weren't so buggy. The controls are so-so. About what you'd expect for a casual puzzle game with tetromino style configurations. The graphics are great. The music is relaxing and easily melts into the background while you're playing. The problem... is that blocks keep disappearing instead of settling where I've placed them, especially when that placement should yield me a line and knock out a bunch of blocks. Blocks randomly disappear. I've even had a block fall into the very bottom corner of the container and stay stuck partially outside of it, where no block should normally be able to reach in the first place.

I also couldn't get any of the powers to work despite using the keys indicated in the How to Play section. The leaderboards are blank.

This game feels like it needs some extra time in beta to work out the bugs before it should be available to the public. It could be a great casual game. Instead it's just frustrating in how it only sometimes works properly.. For better Mega-Drive feel use an actual Mega Drive ;)

Nice game, I recommend. Would love the game if it worked.. I got this DLC in the complete pack. All off them suffer from the same flaws so this review is copied to all of them.

Now. The skins and weapons are totally fine. The problem here is the extreme pricing and the fact that this game has a modding community with better, free, stuff. They even admit that a lot of this is made by said community. I as a console peasant and a sucker did not get this simple fact and pronounced "Yes! I do want to pay more!"

Don't be like me. Don't suck, blow "wait, what?". I mean, it has no progress ... Sure, it has a nice interface and music, but that's all ! Add achievements to this game and more stuff to do / achieve and maybe I will give it a second try.. A lot of fun twin stick shooter, I'd definitely recommend it!. I play this game on and off to pass the time & I must say this game is somewhat complex and has a bit of a learning curve however it is absolutely brilliant. The only things I could fault it on is it's performance on lower end laptops & desktops & the lack of a Gulf war & Vietnam war start date other than that I'd recommend buying this game even if it's not on sale.

This upgrade was not needed, no gold servers are made and these clothing items get boring in a while. Very deep roguelike. Don't be fooled by the production values. The character progression is wonderful and endlessly varied. The mechanics are well thought out with some nifty innovation. It's fun and fast paced and the UI makes sense.. Much better than Fraps: 1) compress video in real time 2) small size of video files 3) good interface and simple settings. It is what it is, a very simple addictive and totally hilarious side shooter, yes there are free flash games similar to this and yes it's a bit pricey But maybe wait until the sales start.. People seem to be confusing "Collectors edition" with "Game Of The Year" edition. Please note that this gives you exclusives as a collector. NOT DLC MAPS.. the game has potential but in its current state it needs a big patch because it's buggy glitchy badly translated and misses a lot of basic options it needs also feels abandoned since there's no support in game. A quick experience but fun nonetheless.. Sad that there is only one game like this.

But this game rocks.
